| Sommario/riassunto      | World Banking Abstracts provides access to all the important articles published internationally in over 400 banking and finance publications. Each issue of the journal contains concise, 75-word abstracts of published information in all areas of finance, classified by subject and fully indexed. The abstracts are drawn from journals, magazines, and hard-to-find research reports such as those from the US Federal Reserve Banks, the EC research institutes and universities throughout the world. Key topics covered include: Financial institutions Insurance and pensions Financial instruments and markets, Financial operations and services, Management, accounting and technology, Policy, law and regulation, International and national economies, Principles and methods. |
