Andrae Van Zundert -- Occipital nerves -- Trigeminal nerve --  
Infiltration of trigger points in the masticatory muscles --  
Cervicothoracic ganglion (stellate ganglion) -- Superior cervical  
ganglion -- Deep (and superficial) cervical plexus -- Brachial plexus --  
Interscalene block -- Supraclavicular perivascular (subclavian  
perivascular) block -- Axillary block -- Shoulder region --  
Suprascapular nerve -- Subscapular nerve blocks -- Infiltration of  
subscapular muscle trigger points ("frozen shoulder") -- Rotator cuff  
muscles -- Injection techniques in the myofascial trigger points --  
Shoulder region: intra-articular injections -- Intra-articular injection  
into the shoulder joint -- Intra-articular injection into the  
acromioclavicular joint -- Elbow and hand region -- Peripheral nerve  
blocks in the elbow region -- Peripheral nerve blocks in the wrist  
region -- Elbow and hand region -- Infiltration of myofascial trigger  
points and intra-articular injections -- Intravenous regional anesthesia  
(IVRA) -- Intravenous sympathetic block with guanethidine (Ismelin) --  
Thorax, abdomen, lumbar, and sacral spinal region -- Thorax --  
Thoracic spinal nerve blocks -- Lumbar spinal region -- Lumbar  
paravertebral somatic nerve block -- Lumbar sympathetic block --  
Abdomen -- Celiac plexus block -- Lumbosacral region --  
Iliolumbosacral ligaments -- Ganglion impar (Walther ganglion) block  
-- Infiltration of the piriform trigger points ("piriform syndrome") --  
Lower extremity -- Lumbar plexus, sacral plexus, and coccygeal  
plexus: anatomy -- Lumbar plexus blocks: introduction -- Inguinal  
femoral paravascular block ("three-in-one" block) -- Psoas  
compartment block (Chayen access) -- Sciatic nerve block -- Blocking  
individual nerves in the lumbar plexus -- Femoral nerve -- Lateral  
femoral cutaneous nerve -- Obturator nerve -- Ilioinguinal and  
iliohypogastric nerves -- Blocking peripheral nerves in the knee joint

## Sommario/riassunto

New to the third edition: new - regional anaesthesia in ophthalmic  
surgery new - intravenous regional anaesthesia new - percutaneous  
epidural neuroplasty a new block for the trigeminal nerve extended  
coverage of the brachial plexus block and infraclavicular block new -  
therapy for tennis elbow and for carpal tunnel syndrome new - intra-  
ganglion injection therapy for muscular piriform syndrome new - latest  
developments in neuroaxial blockade 40% bigger than the last edition  
Regional nerve blocks are i

Sommario/riassunto	The authors report the results of some half dozen years of research into when and how children acquire numerical skills. They provide a new set of answers to these questions, and overturn much of the traditional wisdom on the subject. Table of Contents: 1. Focus on the Preschooler 2. Training Studies Reconsidered 3. More Capacity Than Meets the Eye: Direct Evidence 4. Number Concepts in the Preschooler? 5. What Numerosities Can the Young Child Represent? 6. How Do Young Children Obtain Their Representations of Numerosity? 7. The Counting Model 8. The Development of the How-To-Count Principles 9. The Abstraction and Order-Irrelevance Counting Principles 10. Reasoning about Number 11. Formal Arithmetic and the Young Child's Understanding of Number 12. What Develops and How Conclusions

References Index Reviews of this book: The publication of this book may mark a sea change in the way that we think about cognitive development. For the past two decades, the emphasis has been on young children's limitations. Now a new trend is emerging: to challenge the original assumption of young children's cognitive incapacity. The Child's Understanding of Number represents the most original and provocative manifestation to date of this new trend.--Contemporary Psychology

Reviews of this book: Here at last is the book we have been waiting for, or at any rate known we needed, on the young child and number. The authors are at once sophisticated in their own understanding of number and rich in psychological intuition. They present a wealth of good experiments to support and guide their intuitions. And all is told in so simple and unalarming a manner that even the most pusillanimous will be able to read with enjoyment.-- Canadian Journal of Psychology
