Older people's perceptions about health behaviours overtime in Ireland: implications for health promotionIndex

Sommario/riassunto

Providing a critical review of the current state of health promotion research. This book re-conceptualises the field of health promotion as collaborative and integrating enterprise, rather than as a battlefield for disciplinary and intellectual clashes. It makes a significant contribution to ongoing epistemological, theoretical and methodological debates in health promotion research. With contributors from Sweden, Switzerland, Denmark, Ireland, the UK and the US, Researching Health Promotion will be of interest to students and professionals working in

health promotion, public heal
