| Nota di contenuto       | Preliminary Material -- PROGRESS AND PROBLEMS IN ROMAN DEMOGRAPHY / Walter Scheidel -- THE SEASONAL BIRTHING CYCLE OF ROMAN WOMEN / Brent D. Shaw -- RECRUITMENT AND THE SIZE OF THE ROMAN POPULATION FROM THE THIRD TO THE FIRST CENTURY BCE / Elio Lo Cascio -- MORE IS WORSE: SOME OBSERVATIONS ON THE POPULATION OF THE ROMAN EMPIRE / Bruce W. Frier -- URBAN POPULATION IN LATE ROMAN EGYPT AND THE END OF THE ANCIENT WORLD / Richard Alston -- BIBLIOGRAPHY -- NOTES ON CONTRIBUTORS -- INDEX -- SUPPLEMENTS TO MNEMOSYNE.  |
| Sommario/riassunto      | In conjunction with an extensive critical survey of recent advances and controversies in Roman demography, the four case-studies in this volume illustrate a variety of different approaches to the study of ancient population history. The contributions address a number of crucial issues in Roman demography from the evolution of the academic field to seasonal patterns of fertility, the number of Roman citizens, population pressure in the early Roman empire, and the end of classical urbanism in late antiquity. This is the first collaborative volume of its kind. It is designed to introduce ancient historians and classicists to demographic, comparative and interdisciplinary perspectives, and to situate and contextualize Roman population studies in the wider ambit of historical demography. |

| Sommario/riassunto      | This volume of selected articles is being released in light of the new economic, social and environmental challenges Europe and the United  |

States have been faced with following the end of the Cold War and in the evolving era of globalization. National security, immigration, and the provision of health and other key social services call for a radically different outlook in terms of policy discussions. The contributors of this book focus on seven key policy issues and challenges that currently affect the United States and Europe: income distribution, the gender pay gap, crime and security, unemployment, health care, the demographic question, and environmental regulation. The purpose of this volume is to analyze how public policy within the European context is responding to the challenges posed by this new global era.
