## Sommario/riassunto

There is an impasse in current thinking about youth crime and justice, represented by punitive and harmful practices, and liberal objections to these processes on the other, based predominantly on arguments for 'rehabilitation'. This book aims to arrive at an alternative strategy for resolving the tensions between young people - especially those on and beyond the margins - and the social world which frames their lives. The book is split into three sections: Part 1 focuses on young people, their attitudes and behaviour; Part 2 considers the way in which their be

Sommario/riassunto	Focusing on an area roughly equivalent to the contemporary state of North Rhine-Westphalia, this description of popular religious life between 1830 and 1880 revises established positions of German historiography. It depicts the increasing laicization of the first half of the nineteenth century, with its mediocre church attendance and

secularized morality, and goes on to show how the two decades after 1850 reversed the trend toward secularization. During the latter period, renewal of the people's loyalty to the church encouraged a developing political Catholicism. The author demonstrates that urbanization and industrialization may well have strengthened popular piety, rather than weakening it. He considers a variety of political implications of popular religious life, from the revolution of 1848/49 to the Kulturkampf of the 1870's, and sees political Catholicism in Germany as arising not exclusively from church-state confrontations but from the interaction of new religious practices with a changing socioeconomic environment and a counter-revolutionary ideology.
