Sommario/riassunto	"More than 500 years before the <i>Odyssey</i> and the <i>Iliad</i> , before the biblical books of <i>Genesis</i> or <i>Job</i> , masters of the epic lived and wrote on the Mediterranean coast. The Ugaritic tablets left behind by these master scribes and poets were excavated in the second quarter of the twentieth century from the region of modern Syria and Lebanon, and are brought to life here in contemporary English translations by five of the best known scholars in the field. Included are the major narrative poems, "Kirta," "Aqhat," and "Baal," in addition to ten shorter texts, newly translated with transcriptions from photographs using the latest techniques in the photography of epigraphic materials (sample plate included)."
