

1. Record Nr.	UNISA996250345403316
Titolo	Ullmann's encyclopedia of industrial chemistry
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , 2003
ISBN	9783527306732 9783527339884 3-527-30673-0
Edizione	[6th, completely revised edition.]
Descrizione fisica	1 online resource (40 volumes (30,080 pages)) : illustrations
Collana	Gale eBooks
Altri autori (Persone)	UllmannFritz <1875-1939.>
Disciplina	660.03
Soggetti	Chemistry, Technical Chemical engineering Chemistry, Analytic Chemicals
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	<p>Bibliographic Level Mode of Issuance: Monograph</p> <p>First published in 1914 by Professor Fritz Ullmann in Berlin, the <i>Enzyklopädie der Technischen Chemie</i> (as the German title read) quickly became the standard reference work in industrial chemistry. Generations of chemists have since relied on ULLMANN'S as their prime reference source. Further German editions followed in 1928 - 1932 and 1951 - 1970. The 25 volumes of the 4th Edition, published in 1972 - 1984, were divided into an alphabetically ordered series of 18 volumes and a general series of six volumes which gave an account of the principles and methods of chemical engineering and process technology. ULLMANN'S Encyclopedia of Industrial Chemistry, 5th Edition, was published from 1985 to 1996. This is the first edition that was published in the English language. ULLMANN'S Encyclopedia of Industrial Chemistry, 6th Edition, was published in December 2002. The 40 volumes including one index volume contained 800 major articles, organized in alphabetical order. Now in its 7th Edition, published from 2011, again in 40 volumes, ULLMANN'S has had over 600 of its articles newly written or substantially updated, in addition to several hundred color figures added throughout.</p> <p>ULLMANN'S Online - Since 1997, ULLMANN'S Encyclopedia of Industrial Chemistry has also been available online, allowing easy round-the-clock access and regular content updates. The electronic encyclopedia</p>

offers a range of advanced functionalities: HTML format for easy browsing, PDF format for printing, Structure-based identification and display of chemical compounds, Highlighting of chemical terms, Search for a word or phrase in the entire text, including highlighting of search terms, Perform complicated searches using wildcards and Boolean operators, Perform chemical structure and substructure searches, Follow cross references via hyperlinks. New and updated articles are added to ULLMANN's Online every two months.

Nota di bibliografia

Sommario/riassunto

A reference work detailing the science and technology in all areas of industrial chemistry. Fully international in scope and coverage and published in the English language. It contains nearly 1000 major articles. With more than 16 million words, nearly 10,000 tables, 30,000 figures, and innumerable literature sources and cross-references, Also includes full text index, author index, CAS registry number index, and keyword index.
