| 1. Record Nr. | UNISOBSOBE00067579 |
| Autore | Carner, Josep |
| Titolo | Les bonhomies i altres proses / Josep Carner |
| Pubbl/distr/stampa | Barcelona, : Edicions 62, 1981 |
| ISBN | 8429717382 |
| Descrizione fisica | 339 p. ; 19 cm |
| Collana | <Les >millors obres de la literatura catalana ; 62 |
| Lingua di pubblicazione | Catalano |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| 2. Record Nr. | UNISA996278280603316 |
| Titolo | IEEE Std 1516.1-2010 (Revision of IEEE Std 1516.1-2000) : IEEE Standard for Modeling and Simulation (M&S) High Level Architecture (HLA) : Federate Interface Specification // Institute of Electrical and Electronics Engineers, IEEE-SA Standards Board |
| Pubbl/distr/stampa | New York : , : IEEE, , 2010 |
| ISBN | 0-7381-6247-7 |
| Descrizione fisica | 1 online resource (xii, 363 pages) : illustrations |
| Collana | IEEE Std ; ; 1516.1-2010 |
| Disciplina | 004.22 |
| Soggetti | Computer architecture
Computer simulation - Standards
Mathematical models - Standards
Simulation methods - Standards |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |

The High Level Architecture (HLA) has been developed to provide a common architecture for distributed modeling and simulation. The HLA defines an integrated approach that provides a common framework for the interconnection of interacting simulations. This document, the second in a family of three related HLA documents, defines the standard services of and interfaces to the HLA runtime infrastructure (RTI). These services are used by the interacting simulations to achieve a coordinated exchange of information when they participate in a distributed federation. The standards contained in this architecture are interrelated and need to be considered as a product set, when changes are made. They each have value independently. Keywords: architecture, class attribute, data distribution management, federate, federation, federation execution, federation object model, HLA, instance attribute, instance attribute ownership, interaction class, object class, runtime infrastructure, simulation object model, timeconstrained, time-regulating.
