Sommario/riassunto	<p>The major goal of this conference is therefore to bring together practitioners and scholars from all areas to discuss, demonstrate and exchange research ideas within the scope of fuzzy theory and its applications. The iFuzzy was initiated and hosted by the Taiwan Fuzzy System Association (TFSA) in 2012. To provide better opportunities to disseminate the research results presented at the conference, accepted papers would be published in the proceeding of iFuzzy 2016 and also be included in the IEEE Xplore digital library optionally. At this conference, we have a session for the special issue of International Journal of Fuzzy Systems (IJFS). This journal is indexed in the Science Citation Index Expanded (SCIE). It will be a question and answer session for elected papers and the session is open to all the audience. The guest editors will decide whether to accept those papers to be published in the coming issue of International Journal of Fuzzy Systems on site.</p>
