

1. Record Nr.	UNISA996278340003316
Titolo	2015 IEEE Twelfth International Symposium on Autonomous Decentralized Systems // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2015
ISBN	1-4799-8261-X
Descrizione fisica	1 online resource
Disciplina	004.36
Soggetti	Client/server computing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Opportunities and challenges for implementing highly complex, efficient, and dependable business and control systems have been steadily increasing, driven by the continuous growth in the power, intelligence, adaptiveness and openness of technologies and standards applied in computing, communication and control systems Dynamically changing social and economic situations demand the next generation of systems to be based on adaptive, reusable, and internet and Web enabled technologies and applications Such systems are expected to have the characteristics of living systems composed of largely autonomous and decentralized components Such systems are called Autonomous Decentralized Systems (ADS) The International Symposium on Autonomous Decentralized System (ISADS) has been the premier events in the past twenty four years to have successfully addressed these challenges.</p>
