

1. Record Nr.	UNISA996279427003316
Titolo	IEEE Std 420-1973 (ANSI N41.17) : IEEE Trial Use Guide for Class 1E Control Switchboards for Nuclear Power Generating Stations // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, N.Y. : , : IEEE, , 1973
ISBN	1-5044-0337-1
Descrizione fisica	1 online resource (12 pages) : illustrations
Disciplina	621.381537
Soggetti	Switching theory Electric power distribution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This document applies to all Class 1E control switchboards (for example, main control room assemblies, auxiliary panels, local panels or racks, etc) as defined in Section 3, regardless of their application or location. It does not apply to the non-Class 1E control switchboards, except as they affect the Class 1E control switchboards, but recognizes that Class 1E control switchboards may be adjacent to, or joined with, other non-Class 1E control switchboards. This document includes, but is not necessarily limited to, design, construction, wiring practices, shipping, handling, storage, installation, testing, and quality assurance. General design practices which are not unique to Class 1E control switchboards are not addressed in this document. This document applies to piping systems and Class 1E equipment only as they may affect the integrity of the Class 1E control switchboard.
