| Titolo | ANSI/IEEE Std C57.15-1986 : IEEE Standard Requirements, Terminology, and Test Code for Step-Voltage and Induction-Voltage Regulators // Institute of Electrical and Electronics Engineers |
| Pubbl/distr/stampa | New York, New York : , : IEEE, , 1988 |
| ISBN | 0-7381-2592-X |
| Descrizione fisica | 1 online resource (60 pages) |
| Disciplina | 621.31 |
| Soggetti | Voltage regulators - Standards Adaptive control systems |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | This IEEE Standards product is part of the C57 family on Power Distribution and Regulating Transformers. Electrical, mechanical, and safety requirements are set forth for step-voltage and induction-voltage regulators, single-phase and three-phase, oil-filled and dry-type, not exceeding 2500 kVA of regulation for three-phase units, or not exceeding 833 kVA of regulation for single-phase units. These provide a basis for the establishment of performance, limited electrical and mechanical interchangeability, and safety requirements of equipment described and for assistance in the proper selection of such equipment. |
