

1. Record Nr.	UNISA996279580603316
Titolo	IEEE Standard Specification of General-Purpose Laboratory Cathode-Ray Oscilloscopes / / IEEE
Pubbl/distr/stampa	New York, N.Y. : , : IEEE, , 1970
ISBN	0-7381-4557-2
Descrizione fisica	1 online resource (18 pages)
Collana	IEEE Std ; ; No.311
Disciplina	621.3
Soggetti	Digital oscilloscopes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The purposes of this Standard are: to document the minimum information that users of general-purpose laboratory cathode-ray oscilloscopes typically need; to provide potential purchasers and others with a common means for making comparisons between instruments; and to provide uniformity of information from manufacturers. This Standard applies primarily to general-purpose laboratory cathode-ray oscilloscopes; it does not necessarily apply to specific kinds of oscilloscopes, such as those employing sampling techniques, nor to storage oscilloscopes, spectrum analyzers, television monitors, or other instruments using cathode-ray tube displays.
