1.	Record Nr.	UNISA996279808303316
	Titolo	Mobile Ad Hoc and Sensor Systems (MASS), 2014 IEEE 11th International Conference on / / Institute of Electrical and Electronics Engineers
	Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2014
	ISBN	1-4799-6036-5
	Descrizione fisica	1 online resource (786 pages)
	Disciplina	004.6
	Soggetti	Ad hoc networks (Computer networks) Mobile communication systems
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	Wireless ad hoc communication and mobile networking computing have applications in a variety of environments, such as conferences, hospitals, battlefields, and disaster recovery rescue operations, and are also being actively investigated as an alternative paradigm for Internet connectivity in both urban and rural areas Wireless sensor and actuator networks are being deployed for enhancing industrial control processes and supply chains, and for various forms of environmental monitoring IEEE MASS 2014 is a three track conference sponsored by the IEEE Computer Society It aims at addressing research advances in (i) algorithms and theory, (ii) systems, protocol, and applications, and (iii) experimental evaluation and testbeds, in multi hop wireless ad hoc and sensor networks, covering topics ranging from technology issues to applications and test bed development.
