1. Record Nr.   UNISA996279861503316

   Titolo   ANSI/IEEE Std 1076-1993 : IEEE Standard VHDL Language Reference
                         Manual / / Institute of Electrical and Electronics Engineers

   Pubbl/distr/stampa   New York, NY, USA : , : IEEE, , 1994

   ISBN   0-7381-0986-X

   Descrizione fisica   1 online resource (288 pages)

   Disciplina   621.3819

   Soggetti   VHDL (Computer hardware description language)
                         Computer hardware description languages

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Sommario/riassunto   Aiding in the comprehension and use of IEEE VHDL, this unique product
                         offers a comprehensive & reliable tutorial on VHDL - not available
                         anywhere else. An enhancement to IEEE Std 1076-1993, the interactive
                         tutorial is organized into four modules designed to incrementally add
                         to the user's understanding of VHDL and it's applications. This hands-
                         on tutorial shows clear links between the many levels and layers of
                         VHDL and provides actual examples of VHDL implementation, making it
                         an indispensible tool for VHDL product development and users.
