

1. Record Nr.	UNISA996279876403316
Titolo	ANSI/IEEE Std 141-1986 : IEEE Recommended Practice for Electric Power Distribution for Industrial Plants (IEEE Red Book) // IEEE
Pubbl/distr/stampa	New York : , : IEEE, , 1986
ISBN	0-7381-4148-8
Descrizione fisica	1 online resource (609 pages)
Disciplina	621.319
Soggetti	Electric power distribution - Alternating current Factories - Power supply Factories - Electric equipment Industrial buildings
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A thorough analysis of basic electrical-systems considerations is presented. Guidance is provided in design, construction, and continuity of an overall system to achieve safety of life and preservation of property; reliability; simplicity of operation; voltage regulation in the utilization of equipment within the tolerance limits under all load conditions; care and maintenance; and flexibility to permit development and expansion. Recommendations are made regarding system planning; voltage considerations; surge voltage protection; system protective devices; fault calculations; grounding; power switching, transformation, and motor-control apparatus; instruments and meters; cable systems; busways; electrical energy conservation; and cost estimation.
