

1. Record Nr.	UNISA996279882103316
Titolo	ANSI Std C57.13.2-1986 / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 1988
ISBN	0-7381-4153-4
Descrizione fisica	1 online resource (1 page)
Disciplina	621.3126
Soggetti	Electric power distribution - Standards Nonlinear oscillations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The purpose of this standard is to cover conformance test requirements for current and inductively coupled voltage transformers used for measurement and control functions in unit substations at primary system voltages above 600 V, but not exceeding 38 kV. The report describes relevant performance tests to demonstrate compliance with the applicable standards. The test specimen is normally subjected to all planned routine tests prior to the initiation of the conformance test program.
