

1. Record Nr.	UNISA996279883403316
Titolo	ANSI/IEEE C37.95-1973 : American National Standard Guide for Protective Relaying of Utility - Consumer Interconnections // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1972
ISBN	1-5044-0837-3
Descrizione fisica	1 online resource
Disciplina	333.7932
Soggetti	Electric Utilities Protective relays
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This guide has been prepared to aid in the effective and uniform application of fuses, relays, and their associated switching equipment located at the point of interconnection between the utility and the consumer electrical systems. Descriptions of the various devices, definitions of terms, and references to other technical technical publications have been included to make the guide useful not only to relay engineers, but also to other technical people who may not be intimately familiar with the art of relaying, but who nevertheless have a responsibility for the installation and operation of such interconnections. It includes examples for relaying of typical installations, both with and without consumer generation, and with service from utility radial or loop feeders, either directly from the utility substation bus or from a transmission line. It is expected that the guide will be used by consulting engineers, utility relay and sales engineers, and by consumer engineering and maintenanc.</p>
