| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Sommario/riassunto | <div> Almost one billion people suffer from malnutrition worldwide. While the global population is still growing dramatically, many starve. Our climate is threatened while agricultural production stagnates. Klaus Hahlbrock extols a responsible response to dealing with nature and poses an important question: how can we maintain a viable and vital |

diversity of the species? </div>
