   Sommario/riassunto ICB is the premier forum for the presentation of new advances and
                       research results in the fields of biometrics. The conference is intended
                       to have a broad scope, including fundamental advances in pattern
                       recognition techniques relevant to biometrics, sensor design, new
                       algorithms and or technologies for biometrics, analysis of specific
                       applications, security and privacy, and analysis of the social impacts of
                       biometrics technologies.
