1. Record Nr.   UNISA996280192203316

   Titolo   IEEE standard for software verification and validation

   Pubbl/distr/stampa New York : , : IEEE, , 1998

   ISBN   1-5044-3894-9

   Descrizione fisica 1 online resource (92 pages)

   Disciplina   005.14

   Soggetti   Computer software - Verification - Standards
                       Computer programs - Validation - Standards

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto Software verification and validation (V&V) processes, which determine
                       whether development products of a given activity conform to the
                       requirements of that activity, and whether the software satisfies its
                       intended use and user needs, are described. This determination may
                       includeanalysis, evaluation, review, inspection, assessment, and testing
                       of software products andprocesses. V&V processes assess the software
                       in the context of the system, including the operational environment,
                       hardware, interfacing software, operators, and users.
