

1. Record Nr.	UNISA996280315203316
Titolo	ISO/IEC/IEEE international standard for software engineering : software life cycle processes - maintenance
Pubbl/distr/stampa	New York : , : IEEE, , 2006
ISBN	0-7381-4961-6
Descrizione fisica	1 online resource (44 pages)
Disciplina	005
Soggetti	Software maintenance Software maintenance - Standards Software engineering - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This International Standard describes in greater detail management of the Maintenance Process described in ISO-IEC 12207, including Amendments. This International Standard also establishes definitions for the various types of maintenance. This International Standard provides guidance that applies to planning, execution and control, review and evaluation, and closure of the Maintenance Process. The scope of this International Standard includes maintenance for multiple software products with the same maintenance resources. "Maintenance" in this International Standard means software maintenance unless other wise stated.
