

1. Record Nr.	UNISA996280321603316
Titolo	2015 5th International Conference on the Internet of Things (IOT 2015) Seoul, South Korea, 26-28 October 2015 // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 2015
ISBN	1-4673-8058-X
Descrizione fisica	1 online resource (172 pages) : illustrations
Disciplina	004.678
Soggetti	Internet
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Physical world event processing Novel data collection and analytics on massive amount of physical data stream Advanced manufacturing and logistics with IoT Evaluation of challenges of real world deployments and conclusive suggestions for future deployments Investigation of social and democratizing aspects of 3D printing technology and IoT Internet of Things Architecture Information architecture design, investigation of technologies supporting transitioning functional and processing allocation across system entities Advanced data capture and networking technology Advanced identification, networking technology Service and content oriented networking Interoperability of IoT systems Service and device discovery, synchronization of distributed directory systems, and semantic data description frameworks Social Acceptance of IoT Systems Data security, authentication and authorization Privacy protection and tampering avoidance and detection in IoT systems.
