

1. Record Nr.	UNISA996280413303316
Titolo	IEEE Std 824-1985 : IEEE Standard for Series Capacitors in Power Systems // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1985
ISBN	0-7381-4417-7
Descrizione fisica	1 online resource
Disciplina	620.00218
Soggetti	Capacitors - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Capacitors and assemblies of capacitors, insulation means, switching, protective equipment, and control accessories that form a complete bank for inserting in series with a transmission line are applied. Included are requirements for safety, rating, and protective device levels. Functional requirements for alarm devices, maintenance, design and production tests, and a guide for operation are included. Functional requirements for protective devices are addressed, including varistors and bypass gaps.</p>
