

1. Record Nr.	UNISA996280422703316
Titolo	IEEE Std 802.15.1-2002 . Part 15 Wireless Medium Access Control (MAC) and Physical Layer (PHY) Specifications for Wireless Personal Area Networks (WPANs) : IEEE Standard for Telecommunications and Information Exchange Between Systems - LAN/MAN - Specific Requirements // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York : , : IEEE, , 2002
ISBN	0-7381-3335-3
Descrizione fisica	1 online resource (473 pages)
Disciplina	004.62
Soggetti	Bluetooth technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This IEEE Standards product is part of the 802 family on LAN/MAN.</p> <p>Abstract: The lower transport layers [(Logical Link Control and Adaptation Protocol (L2CAP)), Link Manager Protocol (LMP), baseband, and radio] of the Bluetooth™ wireless technology are defined. Bluetooth is an industry specification for short-range radio frequency (RF)-based connectivity for portable personal devices. The IEEE 802.15.1 Task Group has reviewed and provided a standard adaptation of the Bluetooth specifications (version 1.1) medium access control (MAC) (L2CAP, LMP, and baseband) and physical layer (PHY) (radio). Also specified is a clause on service access points (SAPs), which includes a logical link control (LLC)-MAC interface for the ISO/IEC 8802-2 LLC. A normative annex is included that provides a Protocol Implementation Conformance Statement (PICS) proforma, and an informative high-level behavioral ITU-T Z.100 specification and description language (SDL) model for an integrated Bluetooth MAC sublayer are also specified.</p>
