

1. Record Nr.	UNISA996280430003316
Titolo	IEEE standard for local and metropolitan area networks . Part 20 Air interface for mobile broadband wireless access systems supporting vehicular mobility : physical and media access control layer specification / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, NY : , : IEEE, , [2008] ©2008
ISBN	0-7381-5766-X
Descrizione fisica	1 online resource (xi, 1039 pages) : illustrations
Disciplina	621.382
Soggetti	Broadband communication systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The technical requirements of this standard form a compatibility standard for mobile broadband wireless access systems. The standard ensures that a compliant access terminal (AT) or user terminal (UT) can obtain service through any access node (AN) or base station (BS) conforming to properly selected modes of this standard, consistent with equipment and operator requirements, thus providing a framework for the rapid development of cost-effective, multivendor mobile broadband wireless access systems. This compatibility standard is targeted for use in a wide variety of licensed frequency bands and regulatory environments.</p>
