

1. Record Nr.	UNISA996280499803316
Titolo	IEEE Std 1129-1992 : IEEE Recommended Practice for Monitoring and Instrumentation of Turbine Generators / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1992
ISBN	0-7381-3964-5
Descrizione fisica	1 online resource
Disciplina	621.313
Soggetti	Synchronous generators
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A basic philosophy and guidelines are established for the design and implementation of monitoring systems for cylindrical-rotor, synchronous turbine generators. Monitoring systems are used to display the status of the generator and auxiliary systems while these systems are operating on line. The basic information needed to choose monitoring schemes best suited for each application is provided. This standard does not specify actual equipment or instrumentation, but it does indicate some critical areas where it is important to provide monitoring capability.

2. Record Nr.	UNINA9910484756403321
Autore	Kato Yayoi

Nota di contenuto	Introduction -- Chapter 1. Ideology: Definitions, Approaches, and Critique -- Chapter 2. Analyzing the Language Game: Conceptual Framework, Data, and Methods -- Chapter 3. SOE Reform Discourse under Jiang Zemin -- Chapter 4. SOE Reform Discourse under Xi Jinping -- Chapter 5. Two Faces of Ideology: Double-Edged Sword for Rulers -- Chapter 6. Ideology, Language, and Political Power: Implications for Xi Rule -- Conclusion.
Sommario/riassunto	'This timely book offers valuable insights on key questions in Chinese governance, including the complex role of ideology in policy implementation, and the relationship between central decisionmakers and key state and non-state actors. Using case studies on state owned enterprise reform under Jiang Zemin and Xi Jinping, Kato's extensive research reveals how ideology can be used to mobilize consensus in support of reform initiatives or to obstruct such reforms by those with vested interests.' - Stanley Rosen, Professor, Department of Political

Science, University of Southern California, USA This book analyzes the operational dimension of the Chinese communist party's ideology and reveals the complex relationship between ideology, language, governance, and political power in the broader context of China's economic reforms. The book questions state-centric, legitimacy-focused, and content-based approaches to party ideology and analyzes its practice. Conceptualizing public discourse as a 'language game' played by the rules set by the party, the book examines how party ideology is operationalized by multiple state and non-state actors as political rhetoric for persuasion in contentious reform discourses. Through the case studies of the policy discourses over state-owned enterprise reforms under Deng Xiaoping, Jiang Zemin and Xi Jinping, the book highlights ideology's double-edged operational functions (consensus-inducing and conflict-inducing) and claims that ideology can be a double-edged sword for rulers: It is a vital resource to legitimate and sustain their rule; yet, it potentially destabilizes their rule as well. The book proposes new angles to study ideology, legitimacy, and governance and is aimed at political scientists who study authoritarian governance, policy process, and political communication. Its multi-disciplinary approach also appeals to sociologists, media/communication scholars, and linguists who work on rhetoric, political language, and media discourses. Yayoi Kato is Assistant Professor of Political Science at the Moravian College, Pennsylvania, USA, specializing in Chinese politics. Her research focuses on ideology and propaganda work of the Communist Party of China, political rhetoric, and discourse analysis of China's reform policy debates.
