| Sommario/riassunto      | Replaced by 1120-2004. IEEE Std 1120-1990, IEEE Guide to the Factors to Be Considered in the Planning, Design, and Installation of Submarine Power and Communications Cables, provides a checklist of factors to be considered in the planning, design, and installation of power and communications cables in a submarine environment. It does not attempt to provide complete cable design criteria. |
