

1. Record Nr.	UNISA996280512703316
Titolo	1220-1998 IEEE Standard for Application and Management of the Systems Engineering Process
Pubbl/distr/stampa	[Place of publication not identified], : IEEE
ISBN	0-7381-1544-4
Descrizione fisica	1 online resource (vii, 76 pages) : illustrations
Disciplina	620.001171
Soggetti	Systems engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The interdisciplinary tasks, which are required throughout a system's life cycle to transform customer needs, requirements, and constraints into a system solution, are defined. In addition the requirements for the systems engineering process and its application throughout the product life cycle are specified. The focus of this standard is on engineering activities necessary to guide product development while ensuring that the product is properly designed to make it affordable to produce, own, operate, maintain, and eventually to dispose of, without undue risk to health or the environment.
