

1. Record Nr.	UNISA996280517903316
Titolo	IEEE Std 1207-2011 (Revision to IEEE Std 1207-2004) : IEEE guide for the application of turbine governing systems for hydroelectric generating units // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2011
ISBN	0-7381-6702-9
Descrizione fisica	1 online resource
Disciplina	621.24
Soggetti	Hydraulic turbines Hydroelectric power
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This guide is intended to complement IEEE Std 125, providing application details and addressing the impact of plant and system features on hydroelectric unit governing performance. It provides guidance for the design and application of hydroelectric turbine governing systems. There is a heightened awareness within the electric utility industry of the importance in the effective application of governing systems for dynamic stability. The need exists to provide guidance in the effective governing system application for a better understanding among users.
