

1. Record Nr.	UNISA996280551803316
Titolo	IEEE Std 1278.2-2015 (Revision of IEEE Std 1278.2-1995) - Redline : IEEE Standard for Distributed Interactive Simulation (DIS) -- Communication Services and Profiles - Redline / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2015
ISBN	1-5044-0621-4
Descrizione fisica	1 online resource (4 pages)
Disciplina	621.310420289
Soggetti	Electric apparatus and appliances - Safety measures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>In the various standards there will be found a number of different situations regarding Usual Service Conditions. The following three are typical.</p> <p>1. The group where the maximum ambient temperature is specified. The Standards for Bushings, Fuses, Lightning Arresters, Protector Tubes and Potential Devices where 40 C ambient is used and Marine Equipment where 50 C ambient is used are typical of this group.</p> <p>2. The group where both the maximum and daily average temperatures of the cooling medium are specified. Standards for Transformers, Regulators and Neutral Grounding Devices are typical of this group.</p> <p>3. The group where a higher ambient temperature is specified for silver contacts than for copper contacts. Standards for Circuit Breakers, Air Switches and Switchgear Assemblies are typical of this group.</p> <p>It is suggested that a selection of one of the following groups can be made for the statement of Usual Service Conditions in most of the standards for specific equipment.</p>
