| | Edizione | [1st ed.] |
| | Descrizione fisica | 1 online resource (553 pages) |
| | Collana | Chapman and Hall/CRC Biostatistics Series |
| | Disciplina | 615.19 |
| | Soggetti | Drugs - Testing
Clinical trials - Statistical methods
Pharmacy - Research
Research - Statistical methods |
| | Lingua di pubblicazione | Inglese |
| | Formato | Materiale a stampa |
| | Livello bibliografico | Monografia |
| | Nota di bibliografia | Includes bibliographical references and index. |
| | Nota di contenuto | Totality-of-the-evidence -- Hypotheses testing versus confidence interval -- Endpoint selection -- Non-inferiority margin -- Missing |

data -- Multiplicity -- Sample size -- Reproducible research -- Extrapolation -- Consistency evaluation -- Drug products with multiple components -- Adaptive trial design -- Selection criteria in adaptive dose finding -- Generic drugs and biosimilars -- Precision and personalized medicine -- Big data analytics -- Rare disease drug development.

Sommario/riassunto

"The proposed book will focus on practical issues in pharmaceutical/clinical research and development from both regulatory and scientific perspectives. The book will outline and clarify those issues that have been commonly misused in the subject area of regulatory science"--
