## Sommario/riassunto

Since 1989, more than 165,000 children have been adopted by American parents. Every indication suggests that this number will increase in the years to come. Many of these children arrive with complex medical and behavioural problems. These children require specialized medical attention to help them get well and adjust to their new lives and surroundings. The Handbook of International Adoption Medicine presents an overview of the medical and developmental issues that affect internationally adopted children, offering guidelines for families and physicians before, during, and after adoption. Laurie Miller has comprehensively researched these topics and also draws from over fifteen years of experience in international adoption and orphanages throughout the world. This book shows how to advise families prior to an international adoption, how to perform an effective initial screening assessment of the newly arrived child, how to manage common behaviour problems, and how to recognize and manage developmental and other more long-term problems as they emerge. Sections cover such subjects as the risks of prenatal exposures, problems in growth and development, infectious diseases, and other medical conditions such as inherited disorders, uncertain age, and precocious puberty. This information has never been available in one place, making the book an invaluable resource for families and professionals in the field of international adoption.

2. Record Nr.	UNISA996280649903316
Titolo	IEEE guide for power system protective relay applications of audio tones over voice grade channels // IEEE Power Engineering Society Power Systems Relaying Committee, IEEE-SA Standards Board
Pubbl/distr/stampa	New York, NY : , : Institute of Electrical and Electronics Engineers, , 2004
Descrizione fisica	1 online resource (v, 42 pages) : illustrations
Disciplina	621.317
Soggetti	Protective relays - Standards Telephone communication channels - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This document provides guidelines for applying audio tones over voice grade channels for power system relaying. Included are sections on transmitting and receiving equipment, leased voice grade channels, application principles, installation, and testing. The primary purpose of this document is to guide the power system user in applying, installing, and operating audio-tone protective relaying systems over voice grade channels. Secondly, it is to provide a reference for equipment manufacturers engaged in the design and application of relaying equipment and for telephone personnel engaged in providing telecommunications channels for audio-tone protective relay schemes.

3. Record Nr.	UNINA9910380754003321
Autore	Schweingruber Fritz H
Titolo	Anatomic Atlas of Aquatic and Wetland Plant Stems // by Fritz H. Schweingruber, Andrea Kuerová, Lubomír Adamec, Jiří Doležal
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-33420-1
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (VII, 486 p. 937 illus., 932 illus. in color.)
Disciplina	581.4
Soggetti	Plant anatomy Plants - Development Plants Plant ecology Biodiversity Plant Anatomy/Development Plant Systematics/Taxonomy/Biogeography Plant Ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Anatomical descriptions of Pteridophytes -- Anatomical Descriptions of Dicotyledons -- Anatomical Descriptions of Monocotyledons -- Synthesis of anatomical, Ecological and Phylogenetical Data.
Sommario/riassunto	This book presents light microscopic anatomical images of aquatic and wetland plant stem. It features double-stained cross- and longitudinal sections of almost 400 species of vascular plants from the lowland to the alpine zone in Central Europe, including plants from lakes, ponds, rivers, bogs, fens, wet meadows, saline meadows, tall herb associations and alpine snow beds. The microscopic photographs at various magnifications are supplemented with detailed anatomical descriptions. For each species it provides a photo of the whole plant, a short morphological and ecological description as well as indications about its world- and Central European distribution. The book includes a hydrobotanical and an anatomical section. The hydrobotanical section

describes the ecological classification of aquatic and wetland plants and explains major ecophysiological processes e.g., photosynthesis, mineral nutrition, gas exchange, adaptations to soil anoxia, turion formation and ecology. The anatomical section highlights the variety of structures and anatomical features of vascular plants in all wet environments.
