

1. Record Nr.	UNISA996280653003316
Titolo	IEEE recommended practice for software design descriptions // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, New York : , : IEEE, , 1998
ISBN	0-7381-1456-1
Descrizione fisica	1 online resource (16 pages) : illustrations
Collana	IEEE Std
Disciplina	005.1
Soggetti	Computer software - Development Computer software - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"IEEE Std 1016-1998".
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	References -- Keywords -- Definitions -- Metrics -- Versions -- Footnotes.
Sommario/riassunto	The necessary information content and recommended organization for a software design description are specified. A software design description is a representation of a software system that is used as a medium for communicating software design information. The recommendations, which may be applied to commercial, scientific, or military software that runs on any digital computer, are not limited to specific methodologies for design, configuration management, or quality assurance, or to any particular descriptive technique. Applicability is not restricted by the size, complexity, or criticality of the software.
