

1. Record Nr.	UNISA996280678803316
Titolo	IEEE Std 181-2011 (Revision of IEEE Std 181-2003) - Redline : IEEE Standard for Transitions, Pulses, and Related Waveforms - Redline // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway : , : IEEE, , 2011
ISBN	0-7381-8092-0
Descrizione fisica	1 online resource (71 pages)
Disciplina	621.38
Soggetti	Pulse modulation (Electronics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Approximately 100 terms and their definitions, for accurately and precisely describing the waveforms of pulse signals and the process of measuring pulse signals, are presented in this standard. Algorithms are provided for computing the values of defined terms that describe measurable parameters of the waveform, such as transition duration, state level, pulse amplitude, and waveform aberrations. These analysis algorithms are applicable to two-state waveforms having one or two transitions connecting these states. Compound waveform analysis is accomplished by decomposing the compound waveform into its constituent two-state single-transition waveforms.
