

1. Record Nr.	UNISA996280732303316
Titolo	IEEE Std 1491-2005 : IEEE Guide for Selection and Use of Battery Monitoring Equipment in Stationary Applications // IEEE Power Engineering Society Stationary Battery Committee, Institute of Electrical and Electronics Engineers, American National Standards Institute, IEEE-SA Standards Board
Pubbl/distr/stampa	New York : , : IEEE, , [2005]
ISBN	0-7381-4735-4
Descrizione fisica	1 online resource (vii, 33 pages) : illustrations
Disciplina	621.31242
Soggetti	Electric batteries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Monitoring and measurement of battery parameters is an important element of maintaining a fully operational battery system. This guide presents and discusses measurable parameters of batteries used in stationary battery systems and the utilization of such observations. This guide does not give a listing of commercially available systems, but it does provide a means of establishing specifications for the desired parameters monitored.
