

1. Record Nr.	UNISA996280736503316
Titolo	IEEE Std 1366-1998: : IEEE Guide for Electric Power Distribution Reliability Indices // IEEE
Pubbl/distr/stampa	New York, N.Y. : , : IEEE, , 1999
ISBN	0-7381-1548-7
Descrizione fisica	1 online resource (v, 16 pages)
Disciplina	621.319
Soggetti	Electric power distribution - Reliability
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Superseded by IEEE Std 1366-2003. Useful distribution reliability indices, and factors that affect their calculation, are identified. This guide includes indices that are useful today as well as ones that may be useful in the future. The indices are intended to apply to distribution systems, substations, circuits, and defined regions. Scope: To identify a set of terms and definitions which can be used to calculate power distribution reliability indices and factors. Purpose: To present a set of terms and definitions which can be used to foster uniformity in the development of distribution service reliability indices and factors.
