

1. Record Nr.	UNISA996280743903316
Titolo	IEEE Std 1502-2007 : IEEE Recommended Practice for Radar Cross-Section Test Procedures / / IEEE Antennas and Propagation Society Antenna Standards Committee, Institute of Electrical and Electronics Engineers, IEEE-SA Standards Board
Pubbl/distr/stampa	New York : , : IEEE, , 2007
ISBN	0-7381-5520-9
Descrizione fisica	1 online resource (viii, 60 pages) : illustrations
Disciplina	621.3848
Soggetti	Radar cross sections Radar cross sections - Testing - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This recommended practice describes the process of the measurement of the radar cross section of objects using a test range. The term "radar cross section" is defined, and the characteristics of different types of test ranges are given. The responsibilities of the test range operators are shown to involve test and calibration of the measurement range systems as well as accurately carrying out the measurements. Techniques are described for each stage of this process.</p>
