

1. Record Nr.	UNISA996280749303316
Titolo	IEEE Std 1390-1995 : IEEE Standard for Utility Telemetry Service Architecture for Switched Telephone Network // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 1996
ISBN	0-7381-0572-4
Descrizione fisica	1 online resource (32 pages)
Disciplina	621.37
Soggetti	Electric meters - Standards Telephone systems - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Withdrawn Standard. Withdrawn Date: Feb 06, 2006. This standard describes a utility telemetry service architecture operated over the telephone network. The architecture described is a basic transport architecture capable of supporting many different applications. The text is described in terms of a utility meter reading application, but any enhanced service provider (ESP) communication can be transported. Telemetry calls may be initiated by either the utility/service provider (outbound) or the telemetry interface unit (TIU)/CPE (inbound) on the end user's premise.
