Sommario/riassunto	EMC Europe brings together those working in the field of EMC as well as spectrum management, monitoring and congestion from European countries and from the countries of other parts of the world and create an excellent forum for useful contacts and exchange of scientific and technical information between researchers and practicing engineers from academia, research laboratories, industry and government agencies. The symposium gives the unique possibility to present the progress and results of their work and to exchange ideas, discuss different points of view and share experiences with colleagues involved in electromagnetic compatibility of devices and systems spectrum management, monitoring and congestion.
