

1. Record Nr.	UNISA996280825803316
Titolo	AIEE No 88-1962 : AIEE Proposed Standard for Definitions of Terms Associated With Telemetry // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1962
ISBN	1-5044-0456-4
Descrizione fisica	1 online resource
Disciplina	621.379
Soggetti	Telemeter Remote control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	New definitions of terms associated with telemetry are proposed only when considered necessary and where no known suitable definition exists. No effort has been made to include all terms defined in existing formal glossaries, such as American Standard Definitions of Electrical Terms, ASA C42. It is realized that many terms defined in other publications apply to telemetry as well, and it is expected that these documents will assist in the standardization of telemetry nomenclature.
