

1. Record Nr.	UNISA996280830103316
Titolo	AIEE No 606-1959 : AIEE Recommended Specification for Self Governing of Internal Combustion Engine-Generator Units // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, NJ, USA : , : IEEE, , 1959
ISBN	1-5044-0398-3
Descrizione fisica	1 online resource (24 pages)
Disciplina	681.2
Soggetti	Internal combustion engines Electric measurements Electric generators - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The Recommended Specifications consist of four sections. Specification Sections II, III and IV are complete purchase specifications. They cover alternate arrangements and performance requirements of speed-governing systems for internal combustion engine-generator units. These are printed as individual forms. To gain the maximum benefit from these standards, particularly under normal conditions, it is recommended that the applicable section be included in full and as a part of the complete purchase specifications for the particular engine-generator unit. The Terminology, Section I, includes definitions and applications of terms and some explanatory comments. Pertinent portions of Section I, while not ordinarily transcribed in full, are made an integral part of each speed-governing specification as indicated in paragraphs 2 of Specification Sections II, III, and IV.
