   Sommario/riassunto Annotation The International Symposium on Code Generation and
                       Optimization (CGO) provides a premier venue to bring together
                       researchers and practitioners working at the interface of hardware and
                       software on a wide range of optimization and code generation
                       techniques and related issues The conference spans the spectrum from
                       purely static to fully dynamic approaches, including techniques ranging
                       from pure software based methods to architectural features and
                       support.
