   Titolo   2016 8th International Conference on Cyber Conflict (CyCon) / / IEEE

   Pubbl/distr/stampa [Place of publication not identified] : , : IEEE, , 2016

   ISBN   9949-9544-9-5

   Descrizione fisica 1 online resource (239 pages)

   Disciplina   621.382

   Soggetti   Telecommunication systems
                       Statistical communication theory

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto Annotation In today s increasingly complex cyberspace we see a variety
                       of actors struggling to gain or maintain their position The ubiquitous
                       use of information and communication technologies has had a
                       profound influence on how these actors pursue their goals and
                       interests The 8th International Conference on Cyber Conflict (CyCon
                       2016) will focus on cyber power as one of the core elements of
                       relations between different stakeholders and will discuss how the
                       traditional concept of power applies to cyberspace Both hard and soft
                       power are being employed to achieve strategic and political goals
                       through technical, legal and economic means But how can we assess
                       such power? How can we ensure that such power remains in the right
                       hands? How can we ensure or enforce cyber power without risking
                       conflict escalation? How can we respond to exercises of this power with
                       the right tools and measures? Is there a way to maintain a balance of
                       power in cyberspace?.
