   Sommario/riassunto   ISO/IEC/IEEE 42010:2011 addresses the creation, analysis and
                        sustainment of architectures of systems through the use of architecture
                        descriptions. A conceptual model of architecture description is
                        established. The required contents of an architecture description are
                        specified. Architecture viewpoints, architecture frameworks and
                        architecture description languages are introduced for codifying
                        conventions and common practices of architecture description. The
                        required content of architecture viewpoints, architecture frameworks
                        and architecture description languages is specified. Annexes provide
                        the motivation and background for key concepts and terminology and
                        examples of applying ISO/IEC/IEEE 42010:2011.
