

1. Record Nr.	UNINA9910778439603321
Autore	Crisci Jorge Victor
Titolo	Historical biogeography [[electronic resource] ] : an introduction / / Jorge V. Crisci, Liliana Katinas, Paula Posadas
Pubbl/distr/stampa	Cambridge, MA, : Harvard University Press, 2003
ISBN	0-674-03004-4
Descrizione fisica	1 online resource (264 p.)
Classificazione	RB 10486
Altri autori (Persone)	KatinasLiliana PosadasPaula
Disciplina	578/.09
Soggetti	Biogeography - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 210-239) and index.
Nota di contenuto	Preface; Contents ; Introduction: What Is Historical Biogeography?; I. Methods in Historical Biogeography ; 1. Distribution Areas and Areas of Endemism; 2. Center of Origin and Dispersal; 3. Phylogenetic Biogeography; 4. Ancestral Areas; 5. Panbiogeography; 6. Cladistic Biogeography; 7. Parsimony Analysis of Endemicity; 8. Event-Based Methods; 9. Phylogeography; 11. A Comparison of Methods: The Case of the Southern Beeches; II. Topics in Historical Biogeography; 12. Molecular Phylogenies in Biogeography; 13. Biodiversity and Conservation Evaluations; 14. Species Introduction Conclusion: A Conceptual Framework for the FutureAppendix A: Phylogeny; Appendix B: Software in Historical Biogeography; Glossary; Works Cited; Index
Sommario/riassunto	Though biogeography may be simply defined--the study of the geographic distributions of organisms--the subject itself is extraordinarily complex, involving a range of scientific disciplines and a bewildering diversity of approaches. For convenience, biogeographers have recognized two research traditions: ecological biogeography and historical biogeography. This book makes sense of the profound revolution that historical biogeography has undergone in the last two decades, and of the resulting confusion over its foundations, basic concepts, methods, and relationships to other disciplines of comparative biology. Using case studies, the authors explain and illustrate the fundamentals and the most frequently used methods of

this discipline. They show the reader how to tell when a historical biogeographic approach is called for, how to decide what kind of data to collect, how to choose the best method for the problem at hand, how to perform the necessary calculations, how to choose and apply a computer program, and how to interpret results.

2. Record Nr.	UNISA996308778303316
Autore	Chivers Sally
Titolo	Care Home Stories : Aging, Disability, and Long-Term Residential Care / Sally Chivers, Ulla Kriebner

Sommario/riassunto	Institutional care for seniors offers a cultural repository for fears and hopes about an aging population. Although enormous changes have occurred in how institutional care is structured, the legacies of the

poorhouse still persist, creating panicked views of the nursing home as a dreaded fate. The paradoxical nature of a space meant to be both hospital and home offers up critical tensions for examination by age studies scholars. The essays in this book challenge stereotypes of institutional care for older adults, illustrate the changes that have occurred over time, and illuminate the continuities in the stories we tell about nursing homes.

»Ein sehr interessantes, weiterführendes und nachdenklich machendes Buch. [Es wird] nicht nur ein akademisches Publikum angesprochen, vor allem die Praxis sollte die Lektüre nicht scheuen.« Hermann Brandenburg, [www.socialnet.de](http://www.socialnet.de), 27.02.2018
