Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references (pages 219-236) and index.
Nota di contenuto	Introduction : my boss -- Defining quality : the quest for numerical perfection -- Defining thorough : finding and fixing everything -- Excessive specialization, expectation, and litigation -- Hospitalization : the pinnacle of thorough -- Long term care : the unwitting geriatric ICU -- Quality and value : moving toward a cure -- Afterword : redefining thorough.
Sommario/riassunto	Andy Lazris, MD, is a practicing primary care physician who experiences the effects of Medicare policy on a daily basis. As a result, he believes that the way we care for our elderly has taken a wrong turn and that Medicare is complicit in creating the very problems it seeks to solve. Aging is not a disease to be cured; it is a life stage to be lived. Lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life. Unfortunately, Medicare's payment structure and rules deprive the elderly of the chance to pursue less aggressive care, which often yields the most humane and effective results. Medicare encourages and will pay more readily for hospitalization than for palliative and home care. It encourages and pays for high-tech assaults on disease rather than for

the primary care that can make a real difference in the lives of the elderly. Lazris offers straightforward solutions to ensure Medicare's solvency through sensible cost-effective plans that do not restrict patient choice or negate the doctor-patient relationship. Using both data and personal stories, he shows how Medicare needs to change in structure and purpose as the population ages, the physician pool becomes more specialized, and new medical technology becomes available. Curing Medicare demonstrates which medical interventions (medicines, tests, procedures) work and which can be harmful in many common conditions in the elderly; the harms and benefits of hospitalization; the current culture of long-term care; and how Medicare often promotes care that is ineffective, expensive, and contrary to what many elderly patients and their families really want.

Sommario/riassunto

Im derzeitigen Katalog der Menschenrechte fehlt ein zentrales Recht, das Hannah Arendt das »Recht auf Rechte« nennt. Dadurch bleibt vielen Menschen, wenn sie nicht Staatsbürger\_innen eines Landes sind, in der nationalstaatlichen Praxis das Recht auf politische Mitgestaltung vorenthalten. 70 Jahre nach der Verabschiedung der Allgemeinen Erklärung der Menschenrechte ist daher eine kritische Revision des Menschenrechtsverständnisses dringend erforderlich. Franziska Martinsen erläutert aus radikaldemokratiethoretischer Perspektive, dass Menschenrechte erst dann, wenn sie weniger als humanitäre denn als original politische Rechte verstanden werden, ihr ermächtigendes Potenzial weltweit entfalten können.

»Das Anliegen, das [die Autorin] höchst elaboriert vortragt, bietet sicherlich nicht nur Studierenden der Politikwissenschaft und der Sozialwissenschaften reichlich Diskussionsstoff und eröffnet - weshalb es zu empfehlen ist - eine gebotene Perspektive, die auf der aktuellen Agenda steht.« Arnold Schmierer, [www.socialnet.de](http://www.socialnet.de), 01.10.2019
