Sommario/riassunto

This collection of 14 original articles teaches readers how to conduct qualitative research. Instead of characterizing and justifying certain methods, the contributors show by means of actual research studies what assumptions, procedures, and dilemmas they encountered. Fischer's introduction, which emphasizes the practical nature of qualitative research and the closing chapter, which uses a question-and-answer format to investigate, among other subjects, what is scientific about qualitative research, are complemented by a glossary and other features that increase the book's utility and value.<

Sommario/riassunto

"Islamic Shangri-La transports readers to the heart of the Himalayas as it traces the rise of the Tibetan Muslim community from the 17th century to the present. Radically altering popular interpretations that

have portrayed Tibet as isolated and monolithically Buddhist, David Atwill's vibrant account demonstrates how truly cosmopolitan Tibetan society was by highlighting the hybrid influences and internal diversity of Tibet. In its exploration of the Tibetan Muslim experience, this book presents an unparalleled perspective of Tibet's standing during the rise of post-World War II Asia"--Provided by publisher.
