

1. Record Nr.	UNISA996320169503316
Titolo	Engineering : issues, challenges and opportunities for development
ISBN	92-3-104156-8
Disciplina	303.483
Soggetti	Engineering Engineering - Social aspects Engineers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction to the report -- What is engineering? -- Engineering and human development -- Engineering : emerging issues and challenges -- An overview of engineering -- Engineering around the world -- Engineering for development : applications and infrastructure -- Engineering capacity : education, training and mobility -- Afterword.
Sommario/riassunto	This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.
