Chapters by leading experts and younger scholars from across Europe and beyond cover the evolution of EU policies, the role of policy 'actors'

1.

contribution state theory can make to understanding the EU and its relations with Europe's nations. They consider what theories of governmentality—drawing on the work of Foucault—can contribute. And they demonstrate how particular methodological approaches, such as 'policy trails', and the contribution the sociology of law, can make. Contributors include both specialists in adult education and scholars exploring how work from other disciplines can contribute to this field. This is the first book in a new series from the European Society for Research on the Education of Adults, and draws on work within its Network on Policy Studies in Adult Education.
